

SUMMARY

Motivated and detail-oriented ComputerScience graduatewith a strong academic foundation in software development and problem-solving. Experienced in working on projects that involve designing, developing, and testing digital solutions. Proficient in logical thinking, teamwork, and adapting to new tools and technologies quickly. Eager to contribute to real-world projects, grow in a collaborative environment, and continuously expand my technical and professional skills within a forward-thinking development team

EDUCATION

Bachelor of Computer Science

WISE University

2019-2024

EXPERIENCE

Iman For Education and Vocational Training:

Backend Developer (Volunteer)

Mar 2025 – Apr 2025

I volunteered as a Backend Developer for a charitable e-commerce web application that unified local stores into a single online shopping platform. I was fully responsible for designing, developing, and deploying backend services and RESTful APIs using .NET Core and Entity Framework Core, ensuring smooth data flow, database management, and optimal system performance. I also managed the deployment of backend services on the Railway platform (Docker). This experience enabled me to apply my software engineering knowledge in a real-world environment, enhance my API development, SQL Server, and C# skills, and contribute to a meaningful project while working in a collaborative team with a clear social mission.

The Hope:

Fullstack Developer (Training Course)

Sep 2024 – Dec 2024

trained on developing dynamic web applications using ASP.NET MVC, managing databases with Microsoft SQL Server, collaborating with the team to ensure a smooth user experience, and working on entities to develop and maintain interactive views.

Computer Society:

Frontend Developer (Training Course)

Jun 2024 – Oct 2024

I trained on building user interfaces using HTML, CSS, and JavaScript, assisted in creating interactive and responsive websites, and collaborated with the design team to improve the user experience.

SKILLS

- Communication
 - Time management
 - Program Languages
- Technical skills
 - Problem Solving
 - Research
